The movie, a gripping tale of microbes, medicine, & money, investigates the untold story of Lyme disease, an emerging epidemic larger than AIDS. Each year thousands go undiagnosed or misdiagnosed, often told that their symptoms are “all in their head.” Following the stories of patients and physicians fighting the disease, the film brings into focus a haunting picture of the healthcare system and a medical establishment all too willing to put profits ahead of patients. *“Academy Award nominee for best documentary”*.
